

## CHURCH OF THE FLYING SPAGHETTI MONSTER

There are multiple theories of Intelligent Design. Many people around the world are of the strong belief that the universe was created by a Flying Spaghetti Monster. It was He who created all that we see and all that we feel. We feel strongly that the overwhelming scientific evidence pointing towards evolutionary processes is nothing but a coincidence, put in place by Him.

## WHAT ELSE SHOULD I KNOW?

We have evidence that a Flying Spaghetti Monster created the universe. None of us, of course, were around to see it, but we have written accounts of it. We have several lengthy volumes explaining all details of His power. Also, you may be surprised to hear that there are over 10 million of us, and growing. We tend to be very secretive, as many people claim our beliefs are not substantiated by observable evidence.

## SCIENTIFIC PROOF

He built the world to make us think the earth is older than it really is. For example,

a scientist may perform a carbon-dating process on an artifact. He finds that approximately 75% of the Carbon-14 had decayed by electron emission to Nitrogen-14, and infers that this artifact is approximately 10,000 years old, as the half-life of Carbon-14 appears to be 5,730 years. But what our scientist does not realize is that every time he makes a measurement, the Flying Spaghetti Monster is there changing the results with His Noodly Appendage. We have numerous texts that describe in detail how this can be possible and the reasons why He does this. He is of Course invisible and can pass through normal matter with ease.

## MORE PROOF WITH A GRAPH!!

You may be interested to know that global warming, earthquakes, hurricanes, and other natural disasters are a direct effect of the shrinking numbers of Pirates since the 1800s. The graph above shows the approximate number of pirates versus the average global temperature over the last 200 years. As you can see, there is a

statistically significant inverse relationship between pirates and global temperature.

## WHAT DOES THIS MEAN

We are sure you now realize how important it is that this alternate theory is spread. It is absolutely imperative that everyone realizes that observable evidence is at the discretion of a Flying Spaghetti Monster. Furthermore, it is disrespectful to teach our beliefs without wearing His chosen outfit, which of course is full pirate regalia. I cannot stress the importance of this enough, and unfortunately cannot describe in detail why this must be done as we have run out of space. The concise explanation is that He becomes angry if we don't.

## CONCLUSION

Thank you for taking the time to read about our views and beliefs. We hope this was able to convey the importance of teaching this theory to our children and to everyone. We can all look forward to the time when the three theories of creation are given equal time in our science classrooms across the country, and eventually the world; One third time for Intelligent Design, one third time for Flying Spaghetti Monsterism, and one third time for logical conjecture based on overwhelming observable evidence.

**Why You Should Convert to Flying Spaghetti Monsterism**

- **Flimsy Moral Standards**
- **Every Friday is a religious holiday**
- **Our heaven is WAY better. We've got a Stripper Factory AND a Beer Volcano**

**Smart People Who Agree With Us**

“One of the most exciting developments in physics recently is so-called ‘String Theory’, in which all sub-atomic particles are described as microscopic vibrating strings. Obviously this *is* correct, though misnamed. As NOODLE Theory reveals, He has created the matter in the universe in His own quivering image! You, me, the Earth, the stars...are all built of trillions of tiny jiggling noodles, microscopic copies of our Diving Saucy Maker. Boy-oh-Boyardi and Ramen! ---Steve Lawrence, PhD

“Having now perused the many facets of Pastafarianism, I believe that there is great scope for women in this religion. Clearly the FSM has aspects of both male and female, with both ‘noodly appendages’ and two round meatballs which clearly represent the Breasts of the Great Mother Goddess.—Susan Johnston, PhD

“As a neuroscientist and clinical psychologist, I have often been struck by how the brain resembles pasta. Clearly, the FSM theory is worthy of deep thought. Or at least a side order of garlic toast. Which is more than I can say about ID, which, as St. Sigmund taught, should be subservient to

EGO (Equally Goofy Observations).” – James Blackburn, PhD

The Ontological Argument for FMS

P1. The Flying Spaghetti Monster is a being which has every perfection

P2. Existence is a perfection.

C. Therefore, the Flying Spaghetti Monster exists.

“Pastafarianism does not constitute a scientific theory, despite its apparent adherence to Heisenberg’s Uncertainty Principle regarding the interactions of observer and observed. It should not be taught as science...unless, of course, ID creationism is also taught as science, in which case all bets are off. Best of luck, I’m off to The Old Spaghetti Factory for worship.”—E. Scott
